Forecast for Friday 30 Jun 2023

Weather: Some early brightness but soon turning cloudier from the west, the cloud lowering to shroud summits by the middle part of the day. Outbreaks of rain and drizzle arriving through the morning, and becoming rather persistent, with the odd heavier burst mixed in.

Chance of cloud-free hill tops above 600m: 90% at first, deteriorating to 10% or less through the afternoon and evening.

Low Cloud and visibility: Cloud mostly above summits at first with generally good visibility but cloud lowering and thickening on Friday morning. Cloud lowers further through the afternoon, with extensive cloud above 400-500m, especially on west-facing slopes. Visibility reducing to poor to very poor across most summits.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Deteriorating conditions with poor visibility becoming more extensive across the summits as the day progresses, which could make navigation increasing difficult.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Thu 29 Jun 2023	2.4mm	11mm	13.4mm

Forecast for Saturday 01 Jul 2023

Weather: Cloud and outbreaks of rain and drizzle clearing away in the early hours to leave a bright start to Saturday, perhaps with an isolated light shower. A mixture of sunny spells and isolated, mainly light showers for the rest of the day. It will be rather windy across the summits.

Maximum wind: Westerly 25-30 mph gust 40 to 45mph.

Chance of cloud-free hill tops above 600m: 50% at first, soon improving to 90% or more.

Low Cloud and visibility: Some patchy cloud covering the highest summits at daybreak, but this should soon lift to leave summits generally cloud-free for the remainder of the day.

Temperature: **Valleys:** Plus 11 degrees Celsius rising to Plus 19 degrees Celsius.
At 600m: Plus 11 degrees Celsius.
Freezing level: Above summits.
